PHẦN V: ĐỌC HIỂU VĂN BẢN (READING COMPREHENSION - CÂU 29–36)

Artificial Intelligence (AI) is rapidly revolutionizing the landscape of modern education. In the past, traditional classroom pedagogy adopted a "one-size-fits-all" methodology, where all students were instructed at the exact same pace regardless of individual learning aptitudes. Today, AI-powered educational software can tailor lessons to meet each student's unique needs and abilities.

When a learner struggles with a difficult mathematical formula or a complex grammatical structure, intelligent platforms instantly generate supplementary exercises with scaffolded hints. Conversely, advanced students who grasp foundational concepts quickly are provided with more challenging enrichment materials to stimulate their intellectual curiosity. Furthermore, automated grading systems relieve teachers of hours of manual marking, allowing them to devote more quality time to pedagogical mentoring and emotional counseling.

Nevertheless, experts emphasize that artificial intelligence should be regarded as a powerful complement rather than a substitute for human educators. Teachers foster empathy, critical thinking, creativity, and moral integrity—attributes that no machine or algorithm can genuinely emulate.

Question 29: What is the main idea of the passage?

- A. The history of traditional classrooms.
- B. How AI is transforming modern education.
- C. Why human teachers will lose their jobs.
- D. The disadvantages of learning mathematics online.

- A. It calls their parents immediately.
- B. It provides extra drills with helpful hints.
- C. It reduces the student's exam score.
- D. It forces them to skip the difficult lesson.

Question 32: The word "**them**" in paragraph 2 refers to:

- [illegible]

Question 33: What is one major benefit of automated grading mentioned in the text?

- A. It eliminates all exams at school.
- B. It gives educators more time for mentoring students.
